

The Music Room.

The music room in St. Louis is a vibrant classroom equipped with a large selection of instruments to allow our students to express their musical talent. Some of these instruments include an upright piano, electric piano, violins, guitars, bodhrans and tin whistles.

Our stereo surround sound system allows us to enhance the acoustics of our musical performances.

Modern technology is also an important feature in this classroom. The Lenovo computer, data projector and visualiser all help to enhance the teaching and learning that takes place in this room, while the musical imagery on the walls add to the lovely atmosphere.
