

St. Louis Community Garden.

The Community Garden in St. Louis is an educational facility for our Junior Students and our Senior Students studying Agricultural Science. Throughout the year Brendan Conlon, a member of the staff in St. Louis, teaches a number of our students valuable life skills such as growing and harvesting fruit and vegetables as well as growing flowers from seed. Grow it Yourself Ireland was very impressed with all the work that goes on in the poly tunnel in St. Louis and for this reason we were selected as one of the very few schools in Ireland to receive a grant of €500 from GIY Ireland and AIB.
