Where can I get more information?

www.curriculumonline.ie – This is the website of the National Council for Curriculum and Assessment (NCCA) where you will find key documents such as the Framework for Junior Cycle (2015), the Junior Cycle Science Curriculum specification and Guidelines for the Classroom-Based Assessments and Assessment Task.

www.juniorcycle.ie - Here you can find the Assessment Toolkit which is designed to support and assist teachers in their work on junior cycle assessment.

www.jct.ie - This is the website of the JCT schools' support service. JCT's aim is to support schools in their implementation of the new Framework for Junior Cycle through the provision of appropriate high quality continuing professional development for school leaders and teachers, and the provision of effective teaching and learning resources.

Within your own subject department in your school. Collaboration with teaching colleagues is promoted through professional time allocations.

Follow [@JCforTeachers](https://twitter.com/JCforTeachers) on Twitter and directly with the Science Team using [@jctscience](https://twitter.com/jctscience)

We have a team of full-time advisors who can be contacted by email at info@jct.ie

Learning Journey - Science

A dual approach to assessment, involving classroom-based assessment across the three years of junior cycle and a final externally-assessed, state-certified examination, enables the appropriate balance between preparing students for examinations and also facilitating creative thinking engaged learning and better outcomes for students.

Final Assessment
End of Year 3
Based on a sample of the Learning Outcomes.
Set and marked by the SEC. Accounts for 90% of SEC Grade

Assessment Task
Term 2 of Year 3
Based on the Learning Outcomes of CBA2. Set by NCCA & marked by SEC. Accounts for 10% of SEC Grade

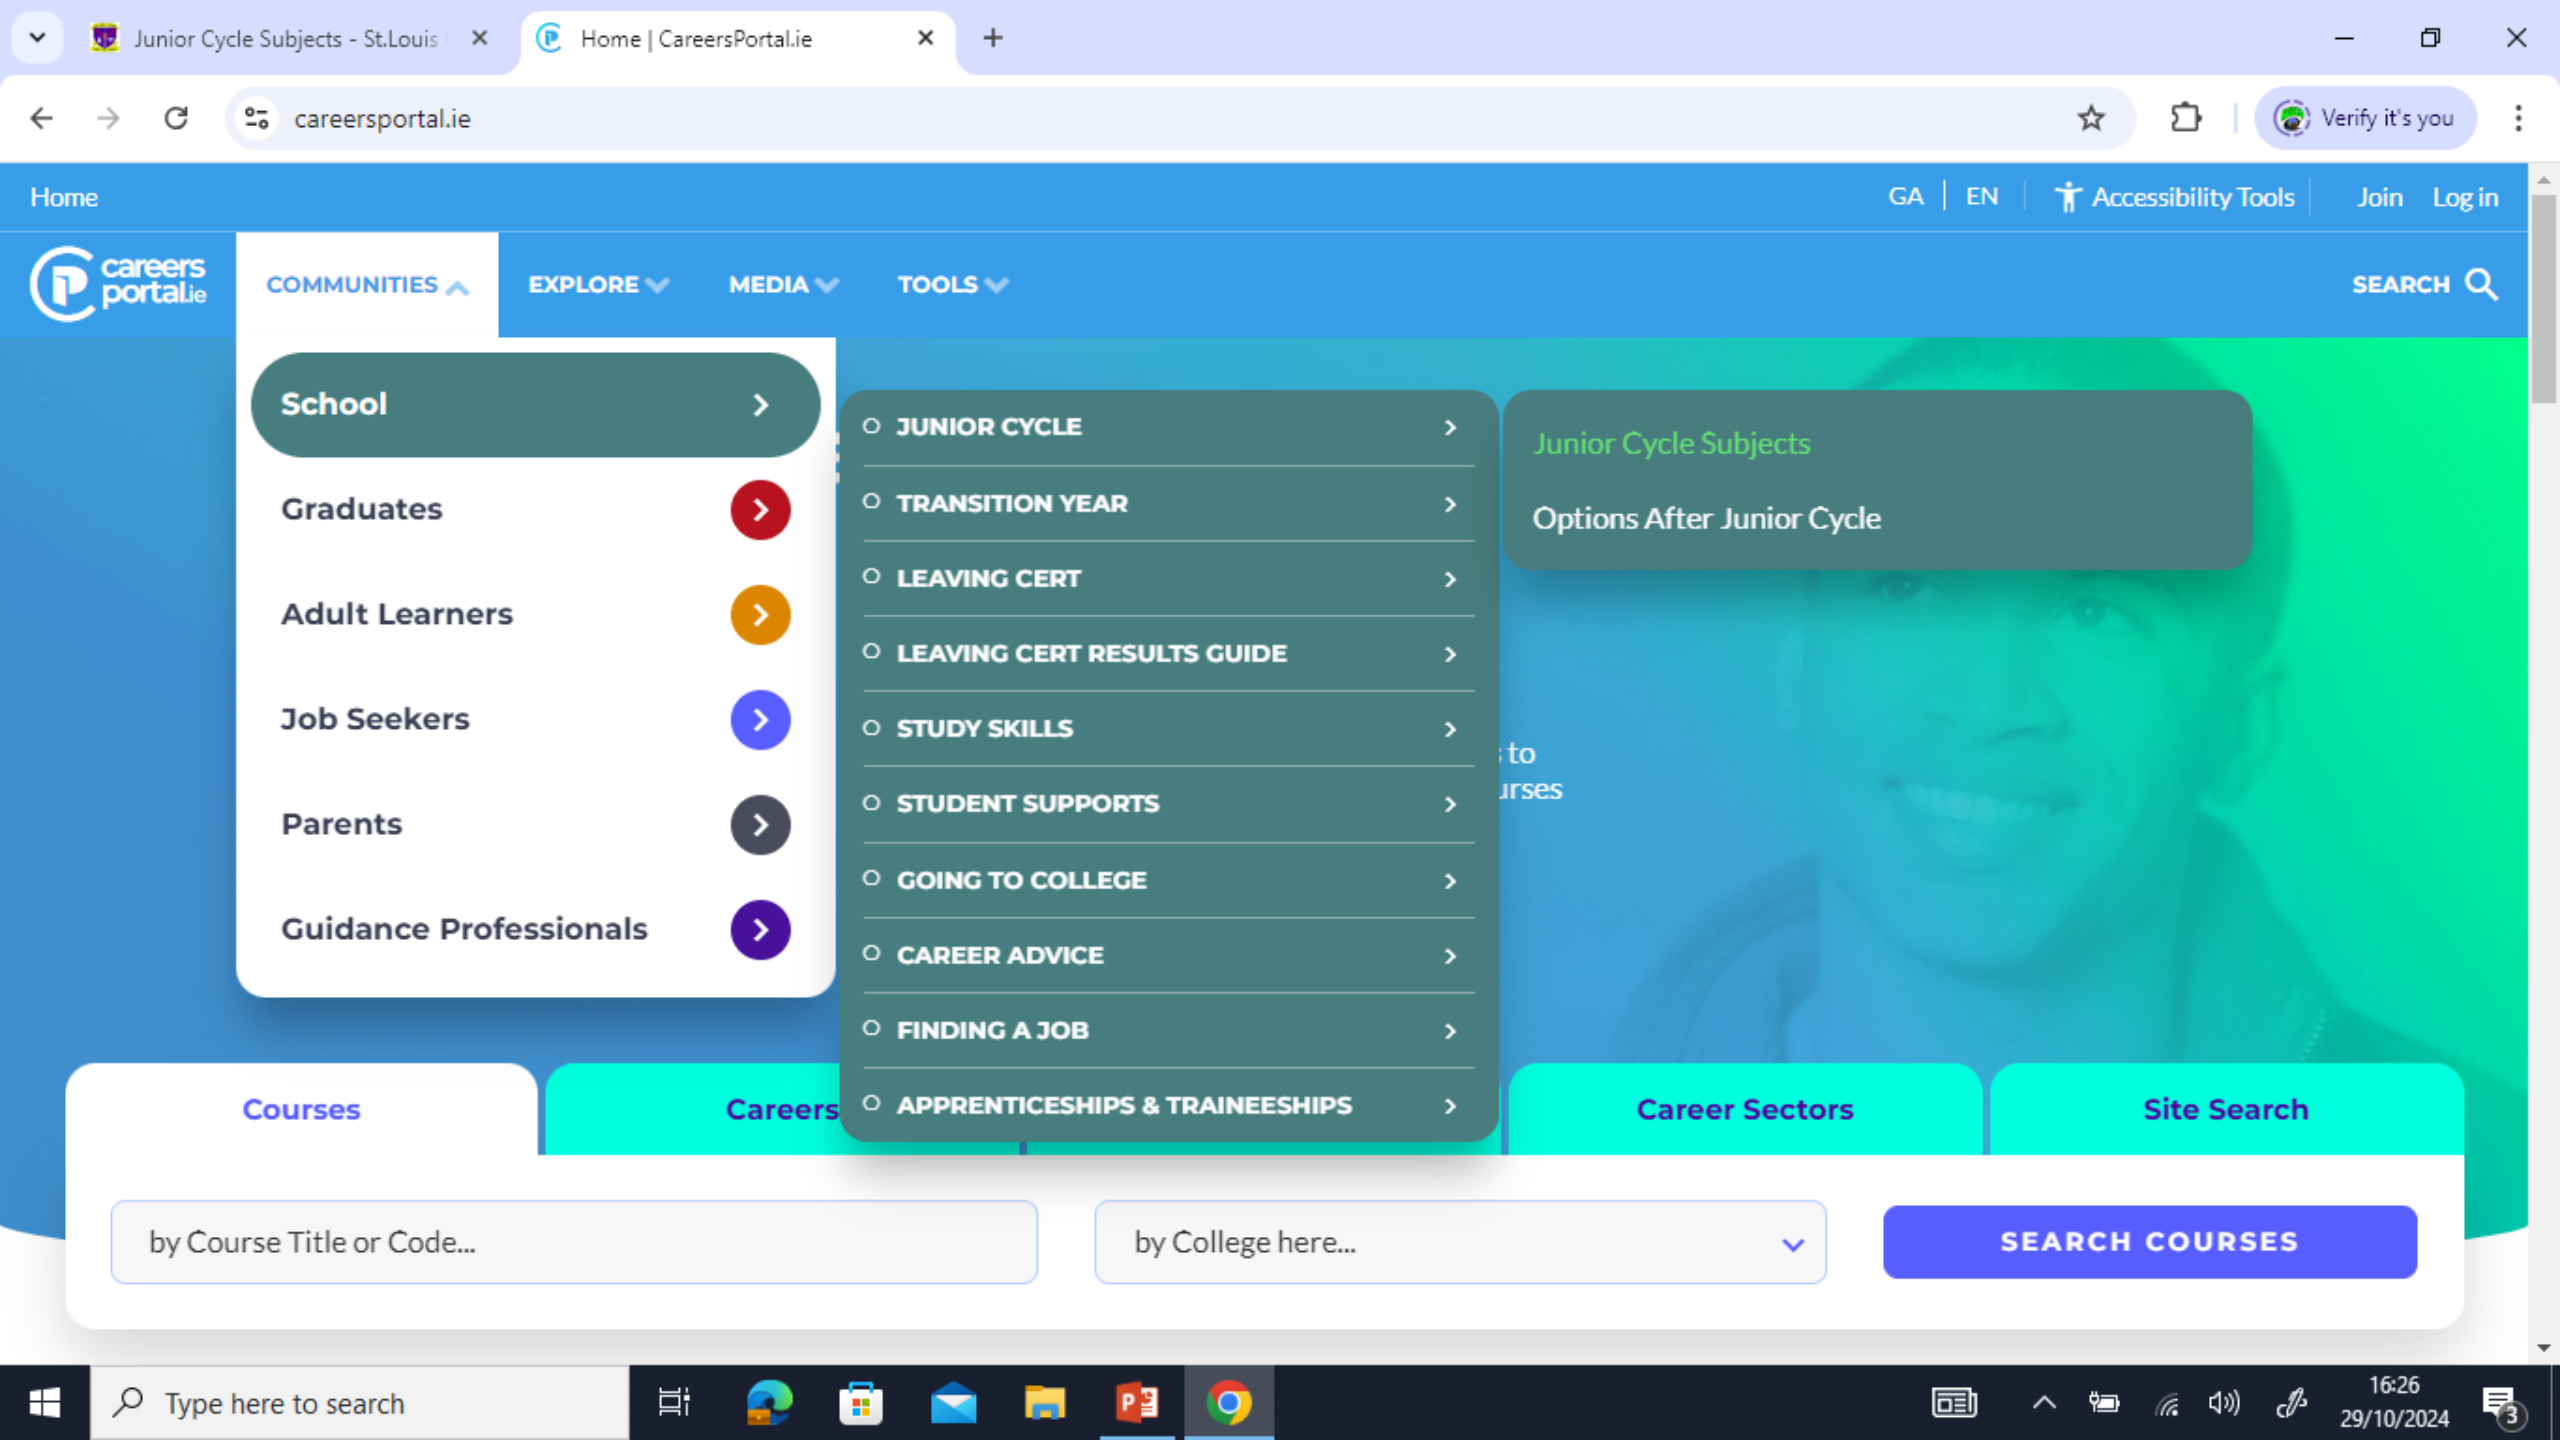

Science in Society Investigation CBA 2
Dec/Jan of Year 3
School based assessment, followed by SLAR. Reported in JCPA using descriptors

Extended Experimental Investigation CBA 1
Year 2 Final Term
School based assessment, followed by SLAR. Reported in JCPA using descriptors

Junior Cycle Subjects

In the Junior Cycle, students will study a combination of **Full Subjects** and **Short Courses**. Of the Full Subjects, *English, Irish, Maths* and *History* are compulsory while all the others are optional i.e. students will choose the remaining subjects during their school's subject choice process. For students who may struggle at this level, an additional range of subjects known as **Learning Programmes** has been designed, three at Level 2 and three at Level 1.

Short Courses are typically half the size of full subjects and do not have a terminal exam. Short Courses offered can vary between schools. **Wellbeing** is central to the Junior Cycle, meaning that subjects such as *SPHE, CSPE* and *PE* are also compulsory.

Practical

These subjects are 'hands-on' and involve working with tools and machinery on physical things like wood, metals and plastic. They may involve designing, planning and building things.

Wood Technology

(Optional)

Applied Technology

(Optional)

Coding

(Short Course)

Digital Media Literacy

Engineering

Wood Technology

(Optional)

BRIEF DESCRIPTION

Materials Technology Wood (MTW) is one of the technology subjects offered at Junior Cycle. In MTW you will learn to design small projects and the skills required to use tools and equipment to make your designs. You will work mainly with wood but also with other materials. You will learn about wood as a material and how it is produced.

HOW WILL WOOD TECHNOLOGY BE USEFUL TO ME?

Students can learn many practical skills that can prove useful for later in life. They will learn the correct procedures to follow when developing an idea into a finished artefact e.g. a piece of furniture or a child's toy etc. They will be able to identify different trees, recognise their importance to us and our environment and they will learn some of the skills to make objects from wood and know how to apply appropriate finishes to them, e.g. paint, varnish, stain or polish.

The specification for Junior Cycle Wood Technology focuses on three interconnected strands: **Principles and practices**, **Design thinking** and **Wood science and materials**.

CAREER GUIDANCE

Subject Group: Practical

These subjects are 'hands-on' and involve working with tools and machinery on physical things like wood, metals and plastic. They may involve designing, planning and building things.

Career Sectors

This subject builds skills and knowledge that are particularly useful for careers in the following Career Sectors:

Art, Craft & Design

Construction, Architecture & Property

Farming, Horticulture & Forestry
